- i) **N'utilisez pas le téléphone, sauf en cas d'extrême urgence.**
- j) **Préparez la maison.**

What is an earthquake ?

When two plates are sliding past each other, parts get locked like teeth. Enormous tension builds up.

Suddenly, rock gives way. The plates lurch forward. Tension is released, and waves of energy ...

... called **seismic waves** travel in all directions. The **earthquake** is the vibrations they cause.
